**If you ever leave:** your domain name stays yours, because it is registered in your name. I will send you a complete copy of your site files and a handoff checklist for any developer you choose, at no charge. If you would like me to move the site to your own hosting account, that is an optional one-time \$150.

**Good to know:** I manage the hosting and technical accounts for you, and your own text and photos always remain yours. Unused edits do not roll over. A website supports your business, but I can't guarantee search rankings, calls, or sales. Details are confirmed in a short written agreement before work begins.
